

Anisha Dahal

Senior Frontend Engineer - React, Next.js, TypeScript

Kathmandu, Nepal | anishadahalofficial@gmail.com

github.com/Anishadahal | linkedin.com/in/anishadahalofficial | medium.com/@anishadahalofficial

Summary

Frontend engineer with **5+ years** shipping **Japanese-market SaaS** in **React, Next.js and TypeScript**. Lead frontend on four products at wesionaryTEAM and ranked **#1 or #2 contributor on seven repositories**, with reviewer and release-manager roles. Owns product surfaces **end to end**, from requirement sessions with Japanese clients through implementation, code review and release. Recent work includes **employee engagement analytics** (LinkVoice), **billing and reporting interfaces** for a Japanese food-service platform (WJUFS), and **SEO with Japanese-English internationalization**.

Skills

Frontend: React 19, Next.js (App Router), **React Router 7, TypeScript**, Tailwind CSS, shadcn/Radix, Chakra UI, Storybook

State and Data: TanStack Query, TanStack Table, React Hook Form, Zod, Recharts, Chart.js, Editor.js, REST, GraphQL, Zustand, Context API

Backend: Go, PostgreSQL, MySQL

Cloud and Ops: AWS (Cognito, Amplify, S3, Elastic Beanstalk), **GCP** (App Engine, BigQuery, Cloud IAP), Firebase, Vercel, Docker, Sentry, Google Tag Manager

AI: AI-assisted development (Claude Code, Cursor, GitHub Copilot)

Practice: Turborepo monorepos, design systems, **i18n** (i18next, next-i18next, JP-EN), **SEO** (JSON-LD, sitemaps, Lighthouse), accessibility, code review, release management

Leadership: Project leadership, client and stakeholder meetings (Japan), requirement gathering and spec reviewing, mentoring, internal knowledge-sharing sessions, Agile, Scrum

Work Experience

Senior Frontend Engineer

Jun 2022 - Present

wesionaryTEAM Co. Ltd. - Tokyo, Japan

- Lead frontend on **four client products**; backend reviewer and release manager on two.
- Ranked **#1 or #2 contributor on seven product repositories**, with **6,800+ commits** across **Next.js, React Router 7** and **Go**.
- Lead **requirement and bug-triage sessions** with Japanese clients, converting Japanese-language specs into scoped, estimated tickets.
- Merged major features and ran **production deploys** as release manager.
- Delivered **three company-wide knowledge-sharing sessions** on SEO.
- Won **2nd place in the 2023 company hackathon** with an AI and Notion workflow automating HR onboarding.

Selected client projects:

WJUFS - kitchen and meal-service management

Sep 2025 - Present

Frontend developer | admin dashboard and customer web-ordering apps for a Japanese food-service operator

- Built the **billing saved-versions experience**: order snapshots with draft and issued versions, diff views and version comparison.
- Implemented **dietary-restriction conflict logic** across five React Router data loaders with substitute-dish coverage checks.

React Router 7, Turborepo, shadcn/ui, AWS Cognito, AWS S3

LinkVoice - employee engagement SaaS

May 2025 - Jul 2026

Frontend and backend team lead, release manager | #1 frontend contributor, 828 commits | client: Gakken Logistics

- Led the **frontend and backend teams** while personally building the **customer analytics screens** across a four-app **React 19** monorepo: **Recharts** drill-down reports, summary dashboards and engagement-score metrics.
- Built **department-tree and matrix tables** with fixed-column scrolling and a reusable filter and combobox system.
- Implemented **AWS Cognito and Amplify authentication** with **MFA, Japanese-English i18n, Sentry** monitoring and **Google Tag Manager**.
- Reviewed and released the **Go and PostgreSQL API**, merging one-shot surveys and a **department-hierarchy refactor** (MPTT to adjacency list).
- Reviewed major portions of the **product spec** and the **Wails desktop client**, including **Windows code signing**.

React 19, React Router 7, Turborepo, Tailwind v4, shadcn/Radix, TanStack Query, Recharts, AWS Cognito, Go (Gin), PostgreSQL

Miraiyu - recruitment and job-placement SaaS

Sep 2023 - Jul 2025

Lead frontend engineer, full-stack | #1 of 8+ contributors, 1,866 commits from inception

- Established the **i18next internationalization infrastructure** for the whole monorepo.
- Built the **candidate introduction and recruitment-step workflow** with document-screening states.
- Built **invoice, refund and billing screens**, member registration and **client-side PDF output**.
- Contributed **Go APIs** for introduction, income and refund flows, job-offer validation and PDF templates.
- Reviewed and merged the **notices and guides APIs** (PDF attachments, admin email notifications) and **admin dashboard statistics**.

Next.js 14, Turborepo, Chakra UI, TanStack Query, Zod, AWS Cognito, Go (Gin, uber-fx, GORM), MySQL

wesionary.team - corporate site and blog CMS

Jul 2025

Frontend engineer | top contributor, 571 commits

- Built the **blog CMS** across the admin and public apps: **Editor.js** article editor, automatic table of contents and article preview.
- Added **tag and category filtering**, debounced search, related-article carousels and breadcrumbs.
- Ran site-wide **SEO and accessibility remediation**: heading hierarchy, **next/image** migration with alt text, HTML sanitization.
- Maintained the shared **atomic design-system package**.

Next.js, React 18, Chakra UI, Turborepo, Storybook, Editor.js

Nennai Nyushi Navi - university admissions platform

Jan 2024 - Jun 2025

Senior frontend engineer | #2 of 16 contributors, 1,506 commits | nennai-nyushi-navi.jp

- Built **entrance-exam management** with **AI-assisted entrance data generation**, bulk-add flows and dynamic faculty and department form builders.
- Built a **blog CMS** on a customized rich-text editor.
- Owned **SEO**: sitemap and robots generation, **JSON-LD structured data** and page metadata.
- Improved performance with **upload-time image compression, CDN delivery** and **Lighthouse-driven optimization**.

Next.js 14 App Router, Turborepo (3 apps, 10 packages), TanStack Query, React Hook Form, Zod, AWS Amplify, Storybook

VMP - real-time video analytics dashboard

Feb 2025 - Apr 2025

Lead frontend engineer | #1 contributor, 171 commits

- Took a **BigQuery-backed analytics dashboard** from **zero to production in two months**.
- Built a **real-time tracker** mapping live **YouTube video metrics** (views, likes, shares) alongside BigQuery-backed historical data.
- Built **Chart.js** line and bar charts with daily, weekly and monthly views, skeleton states and paginated **TanStack tables**.
- Built **multi-select filters** and date-range pickers synced to **URL query parameters** for shareable dashboard state.
- Handled **Google Cloud Identity-Aware Proxy (IAP)** token-lifecycle management.

Next.js 15, React 19, TanStack Query, TanStack Table, Chart.js, BigQuery, Google Cloud IAP

Coaching Cloud - coaching and training SaaS

Apr 2023 - Mar 2025

Frontend developer | #1 contributor, 727 commits

- Built **coach, student and class-enrollment management** with **attendance tracking** across admin and company portals.
- Implemented **Cognito/Amplify authentication** flows, including login, forgot-password and reset screens.
- Built **video watch-history and filtering**, survey screens, and data tables with filters and pagination.
- Integrated **i18next Japanese-English internationalization** across the UI.

Next.js 13, Turborepo, TanStack Query, React Hook Form, Yup, AWS Amplify (Cognito), i18next, Chart.js, React Player

MELD - live-event companion service

Aug 2022 - Jan 2024

Lead frontend engineer, full-stack | #1 contributor, 1,150+ commits | meld.co.jp

- Built **email and social login**, event search and favorites across user and admin apps.
- Implemented a **JPY 480/month Stripe subscription** with payment screens, coupon support and account deletion.
- Wrote **Go APIs** for search-word management, templated-email user deletion, and paginated event and inquiry search.
- Handled **production release merges** and integrated client-provided **Japanese-English translations**.

Next.js 13, Turborepo, Chakra UI, React Query, Firebase Auth, Stripe, Go (Gin), MySQL, GCP App Engine

Web Developer (Frontend)

Oct 2021 - Jun 2022

WEBO Digital (Intuji) - Perth, Australia

- Rebuilt a WordPress business site as a **headless Next.js frontend** using the WordPress **GraphQL API**.
- Managed global state across client projects with **Context API**, **Redux Toolkit** and **Recoil**.
- Mocked REST APIs with **Mockoon** and **JSON Server** to keep frontend work ahead of backend delivery.

QA Engineer (Intern)

May 2021 - Sep 2021

WEBO Nepal Pvt. Ltd. (Intuji) - Kathmandu, Nepal

- Wrote **Python and Selenium** automation plus **PyTest** unit tests.
- Built a reusable checker for **broken links and images** on any page.

Personal Projects

Janahit / Janasewa - pharmacy sales and inventory system

Mar 2026

Sole developer | in production use at a local pharmacy

- Shipped a **production sales dashboard** on a **zero-cost stack**: Google Sheets datastore behind **Vercel serverless REST endpoints**.
- Implemented **role-based access control** and **JWT sessions** in signed HTTP-only cookies with 8-hour expiry.
- Rebuilt it as a full management system on **Next.js App Router** with **Prisma and PostgreSQL**.
- Added **analytics dashboards**, medicine and pricing management, sales entry, soft delete and low-stock monitoring.

React 18, Vite, Next.js App Router, TypeScript, Tailwind CSS, shadcn/ui, TanStack Table, TanStack Query, Recharts, Zod, Prisma, PostgreSQL, Vercel

Notion translation Chrome extension

Jan 2024

Sole developer | internal tool for a Japanese-English team

- Built a **DeepL-backed Chrome extension** with background-script architecture and a Notion-scoped context menu.
- Implemented **in-place rendering** of translated text and secure API-key handling.

TypeScript, Next.js, Tailwind CSS, Chrome Extension APIs, DeepL API

Education

Master of Business Administration

2024 - Present

Lincoln University, Nepal

B.Sc. Computer Science and Information Technology

2016 - 2020

Birat Kshitiz College, Tribhuvan University - Biratnagar, Nepal

Awards

- **2nd place** - wesionaryTEAM internal hackathon, AI-driven HR process automation (2023)
- **Master of Efficiency** - wesionaryTEAM, 2023
- **2nd place** - Innovate Code Camp, Spectra 1.0, Purwanchal Campus Committee, Dharan
